20. FAIR VALUE MEASUREMENT

The NAIC SAP defines fair value, establishes a framework for measuring fair value, and outlines the disclosure requirements related to fair value measurements. The fair value hierarchy is as follows:

Level 1 — Quoted (unadjusted) prices for identical assets in active markets.

Level 2 — Other observable inputs, either directly or indirectly, including:

- Quoted prices for similar assets in active markets
- Quoted prices for identical or similar assets in nonactive markets (few transactions, limited information, noncurrent prices, high variability over time, etc.)
- Inputs other than quoted prices that are observable for the asset (interest rates, yield curves, volatilities, default rates, etc.)
- Inputs that are derived principally from or corroborated by other observable market data

Level 3 — Unobservable inputs that cannot be corroborated by observable market data.

The estimated fair values of bonds and short-term investments (“investments”) are based on quoted market prices, where available. The Company obtains one price for each security primarily from a third-party pricing service (“pricing service”), which generally uses quoted prices or other observable inputs for the determination of fair value. The pricing service normally derives the security prices through recently reported trades for identical or similar securities, making adjustments through the reporting date based upon available observable market information. For securities not actively traded, the pricing service may use quoted market prices of comparable instruments or discounted cash flow analyses, incorporating inputs that are currently observable in the markets for similar securities. Inputs that are often used in the valuation methodologies include, but are not limited to, non-binding broker quotes, benchmark yields, credit spreads, default rates and prepayment speeds. As the Company is responsible for the determination of fair value, it performs quarterly analyses on the prices received from the pricing service to determine whether the prices are reasonable estimates of fair value. Specifically, the Company compares the prices received from the pricing service to prices reported by its custodian, its investment consultant and third-party investment advisors. Additionally, the Company compares changes in the reported market values and returns to relevant market indices to test the reasonableness of the reported prices. Based on the Company’s internal price verification procedures and review of fair value methodology documentation provided by independent pricing services, the Company has not historically adjusted the prices obtained from the pricing service.

In instances in which the inputs used to measure fair value fall into different levels of the fair value hierarchy, the fair value measurement has been determined based on the lowest level input that is significant to the fair value measurement in its entirety. The Company’s assessment of the significance of a particular item to the fair value measurement in its entirety requires judgment, including the consideration of inputs specific to the asset or liability.

A. Fair Value

(1) Fair Value Measurements at Reporting Date

The Company does not have any financial assets that are measured and reported at fair value on the statutory basis statements of admitted assets, liabilities, and capital and surplus at June 30, 2013 and December 31, 2012.

25. CHANGE IN INCURRED CLAIMS AND CLAIMS ADJUSTMENT EXPENSES

Changes in estimates related to the prior year incurred claims are included in total hospital and medical expenses in the current year in the accompanying statutory basis statements of operations. The following tables disclose paid claims, incurred claims, and the balance in the claims unpaid, accrued medical incentive pool and bonus amounts, aggregate health claim reserves and health care receivables at June 30, 2013 and December 31, 2012:

The liability for claims unpaid, accrued medical incentive pool and bonus amounts, aggregate health claim reserves and health care receivables as of December 31, 2012 were \$87,137. As of June 30, 2013, \$59,135 has been paid for incurred claims attributable to insured events of prior years. Reserves remaining for prior years are now \$35,267 as a result of re-estimation of unpaid claims. Therefore, there has been \$7,265 unfavorable prior year development since December 31, 2012 to June 30, 2013. The primary drivers consist of favorable development as a result of a change in the provision for adverse deviations in experience of \$3,373 offset by unfavorable development of \$10,166 in retroactivity for inpatient, outpatient, physician, and pharmacy claims. At December 31, 2012, the Company recorded \$4,199 of favorable development. The primary drivers consist of favorable development as a result of a change in provision for adverse deviations in experience of \$3,782 and \$234 favorable retroactivity for pharmacy rebates. Original estimates are increased or decreased, as additional information becomes known regarding individual claims. The unfavorable development also impacts the original estimates and calculations for retrospectively rated policies. As a result of the prior year effects, on a regular basis, the Company adjusts revenue and the corresponding receivable related to retrospectively rated policies, and the impact of the change is included as a component of change in reserve for rate credits in the statutory basis statements of operations.

The Company incurred claims adjustment expenses of \$11,323 and \$27,790 for the six months ended June 30, 2013 and the year ended December 31, 2012, respectively. These costs are included in the management service fees paid by the Company to UHS as a part of its management agreement (see Note 10). The following tables disclose paid CAE, incurred CAE, and the balance in the unpaid claim adjustment expenses reserve for the six months ended June 30, 2013 and the year ended December 31, 2012:

	June 30, 2013	December 31, 2012
